Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: The Maeda reference was discussed as it relates to currently pending claim 1. Figure 3 was discussed as to the configuration that the internal antenna and battery would take when the apparatus is fully assembled. The Examiner expressed the opinion that when fully assembled, it would be inherent that the battery 1 must extend at least partially into the aperture formed by internal antenna 2. No agreement was reached regarding the characterization of this figure.
